# How monthly consistency impacts SHA coin earnings

Tier rates used: Bronze 10%/20%/30% | Silver 20%/30%/40% | Gold 30%/40%/50% | Platinum 40%/50%/60%

Four PCMO mechanic journeys | Illustrative quarterly view

**KEY RULE** A missed month resets the next earning rate to Month 1

| SCENARIO (M1 -> M2 -> M3) | MONTH 1 | MONTH 2 | MONTH 3 | QUARTER IMPACT |
|---|---|---|---|---|
| 1 Miss → Gold → Silver | MISSED 0% — No payout | GOLD 30% — bonus rate | SILVER 30% — bonus rate | 30% of M1 Gold+ 30% of M2 consistency — Recovery starts at M1 rate |
| 2 Bronze → Miss → Gold | BRONZE 10% — bonus rate | MISSED 0% — No payout | GOLD 30% — bonus rate | 10% of M1 base + Reset to M1 + 30% of M1 base — Reset after M2 miss |
| 3 Silver → Bronze → Miss | SILVER 20% — bonus rate | BRONZE 20% — bonus rate | MISSED 0% — No payout | 20% of M1 base + 20% of M2 consistency + Reset to M1 — M3 earning lost |
| 4 Gold → Bronze → Platinum | GOLD 30% — bonus rate | BRONZE 20% — bonus rate | PLATINUM 60% — bonus rate | 30% of M1 base + 20% of M2 consistency + 60% of M3 consistency — Highest earning journey |

**How to read the earnings** Monthly SHA coin bonus = SHA coins earned on focused SKU scans × applicable monthly bonus rate

*Actual coins depend on focused scans and the base coin value.*
